Mission
Disseminate the advances of the research carried out by the specialists of the National Institute of Research in Public Health (INSPI), as well as that of their national and international peers in the area of advances in medical science and technology, in the field of medicine. By publishing articles in their different categories, especially the originals written in Spanish and English, hoping to contribute to health development and innovation.

Vision
To become a reference in the short term for the global community in the field of scientific communication specialized in health and position ourselves among the main options in medical scientific publication in Ecuador.

Scope
INSPILIP is aimed at the scientific community, researchers and local, national and foreign professionals related to medicine, science, technology and health research. Accepts articles submitted in several languages, considering Spanish as primary and English as secondary.
